

If your SMOKE DETECTOR is chirping, try these steps:

- Watch this [video](#).
- Replace the batteries in the smoke detector.
 - Most smoke detectors use 9V batteries, some use AA batteries or even another variation.
 - For best replacement, look at what is currently in the smoke detector and match with the same batteries.
 - Sometimes you will need to remove the smoke detector off the wall to gain access to the batteries.
 - To remove the smoke detector, spin the smoke detector until it is free from the wall bracket.
 - Replace the batteries and spin back to lock into place.

If these steps do not solve your issue, submit a [Maintenance Request](#) through your Online Tenant Portal.

Warning: Per the terms of your lease, if a preferred vendor is called out to fix a problem and it is simply one of the above causes, you will be charged for the service call.
